To whom it may concern:

I would like to thank the incredible crew at J.R.B. Enterprises for the fabulous job they did on our roof this summer. Our roof was hail damaged in May of 2014 and we had just received a quote on repairs. J.R.B. came out and did a subsequent quote and found many errors in the original. They meticulously went back to the insurance claim adjuster multiple times to ensure that we received all the repairs necessary.

We live in an old Victorian with a very difficult slope that showed many, many, previous repairs, some of which were not great, others simply layer upon layer. At every turn the roofers ran into unexpected findings but never once waived despite the setbacks. Even though a two day job turned into a five day job, it was a remarkable feat considering rain delays and difficult conditions.

Every day the crew cleaned the surroundings beyond what would be expected at a construction site, were very considerate of the neighborhood impact with their vehicles, and were understanding of our need to continue routines. They documented progress and previous errors prodigiously to help mitigate insurance concerns and kept in continual contact with us on the progress of all parties.

I would be honored to speak to anyone contemplating roof repair or replacement, about this professional talented company.

Best,

Gina Solazzi
